

WANTED

It had seemed the recent rash of reported peeping toms had come to an end November 23rd, 2011 when police apprehended Spiderman hanging around outside of Lois Lane's bedroom window. Lane's new suitor, Gen. Zod, spotted Spiderman concealed behind a web outside the window and, after calling the police, placed Spiderman under citizen's arrest.

Shortly after his arrest Spiderman made a statement claiming his spidey sense was tingling and he was worried for Lane's well being. Lane claims it was something else of Spiderman's that was tingling. Spiderman was held for questioning and released on his own recognisance. Spiderman's ex-girlfriend, Wonder Woman, has since come forward with proof of this and other sex crimes. Authorities have been unable to locate Spiderman and it is assumed he has fled the country. Spiderman is now believed to be extremely guilty and an enemy of the state.

Spiderman is considered extremely dangerous. If you have any information regarding the whereabouts of this dangerous criminal please send an email with all relevant details to stopsuperheroesnow@gmail.com.
